A word-forming game for at least two players that includes twenty
eight aligned playing pieces. Each playing piece has front and rea
indicia thereon that includes an uppercase letter and a corresponding
lowercase letter therebelow. The front and rear indicia of a first and
twenty-eight playing pieces is a "star," while the front indicia of
second to a twenty-seventh playing piece are each respective letters of
the alphabet in alphabetical order and the rear indicia of the second to
the twenty-seventh playing pieces are each also respective letters of the
alphabet, but in reverse alphabetical order. The method of playing the
word-forming game includes making as many words as possible from the
twenty-eight playing pieces, removing the associated letters therefrom
each time a word is made. The last player to be able to make a word is
the winner.
